EDUCATION

IDN BOARDING SCHOOL

- Software Engineering Major | 2021- 2022

KODEIN

- Software Engineering Major | 2022-2023

SKILLS

- Flutter (Dart) & Multi-platform
- BLoC, GetX, & Riverpod
- Clean Architecture & SDUI
- REST API (Dio) & GraphQL
- Firebase / Supabase
- Node.js, Python, & React.js
- AI Agents & Automation
- Git & CI/CD (CodeMagic)
- Problem Solving & Debugging
- Agile & Scrum Collaboration

LANGUAGES

- Indonesian: Native
- English: Intermediate

PROFILE SUMMARY

Results-driven **Mobile Developer** with 3+ years of experience in **Flutter (Dart)**, delivering high-impact apps for Fintech and Insurance. Expert in **Riverpod/BLoC**, **SDUI**, and **AI Agent** integration. Adept at automating workflows via **CodeMagic CI/CD**. Versatile across the stack with **Node.js** and **React.js**, focused on scalable, clean code that drives product efficiency.

WORK HISTORY

DigiNergy GmbH
Mobile Flutter Developer
Jan 2025 - Dec 2025

- Developed high-performance apps using Flutter with Riverpod for state management.
- Implemented Server-Driven UI (SDUI) to enable instant, dynamic interface updates.
- Integrated AI Agents via LLM APIs to automate core user features.
- Streamlined data fetching using GraphQL and Supabase backend.

PT Wisesa Consulting Indonesia
Mobile Flutter Developer
Oct 2024 - Jan 2025

- Launched School Management & Package Tracking apps utilizing Flutter with GetX and BLoC architectures.
- Engineered Express.js APIs and integrated them via Dio for seamless mobile consumption.
- Optimized performance by implementing GetStorage for efficient, lightweight local data persistence.
- Utilized Clean & Modular Architecture to ensure long-term code maintainability and scalability.
- Ensured timely delivery of features through active collaboration within an Agile development team.

PT Reliance Insurance
Mobile Flutter Developer
May 2023 - Nov 2023

- Led end-to-end development of ReliOTO and ReliPay using Flutter with GetX and BLoC.
- Integrated Xendit Payment Gateway and QR/Barcode flows for secure digital transactions.
- Architected local data persistence using Hive and SharedPreferences for offline efficiency.
- Optimized API performance by standardizing error-handling and request management via Dio.
- Automated Store deployments through CodeMagic CI/CD, ensuring stable release cycles.
- Enforced Clean & Modular code to improve maintainability and team development velocity.
